1. Intro

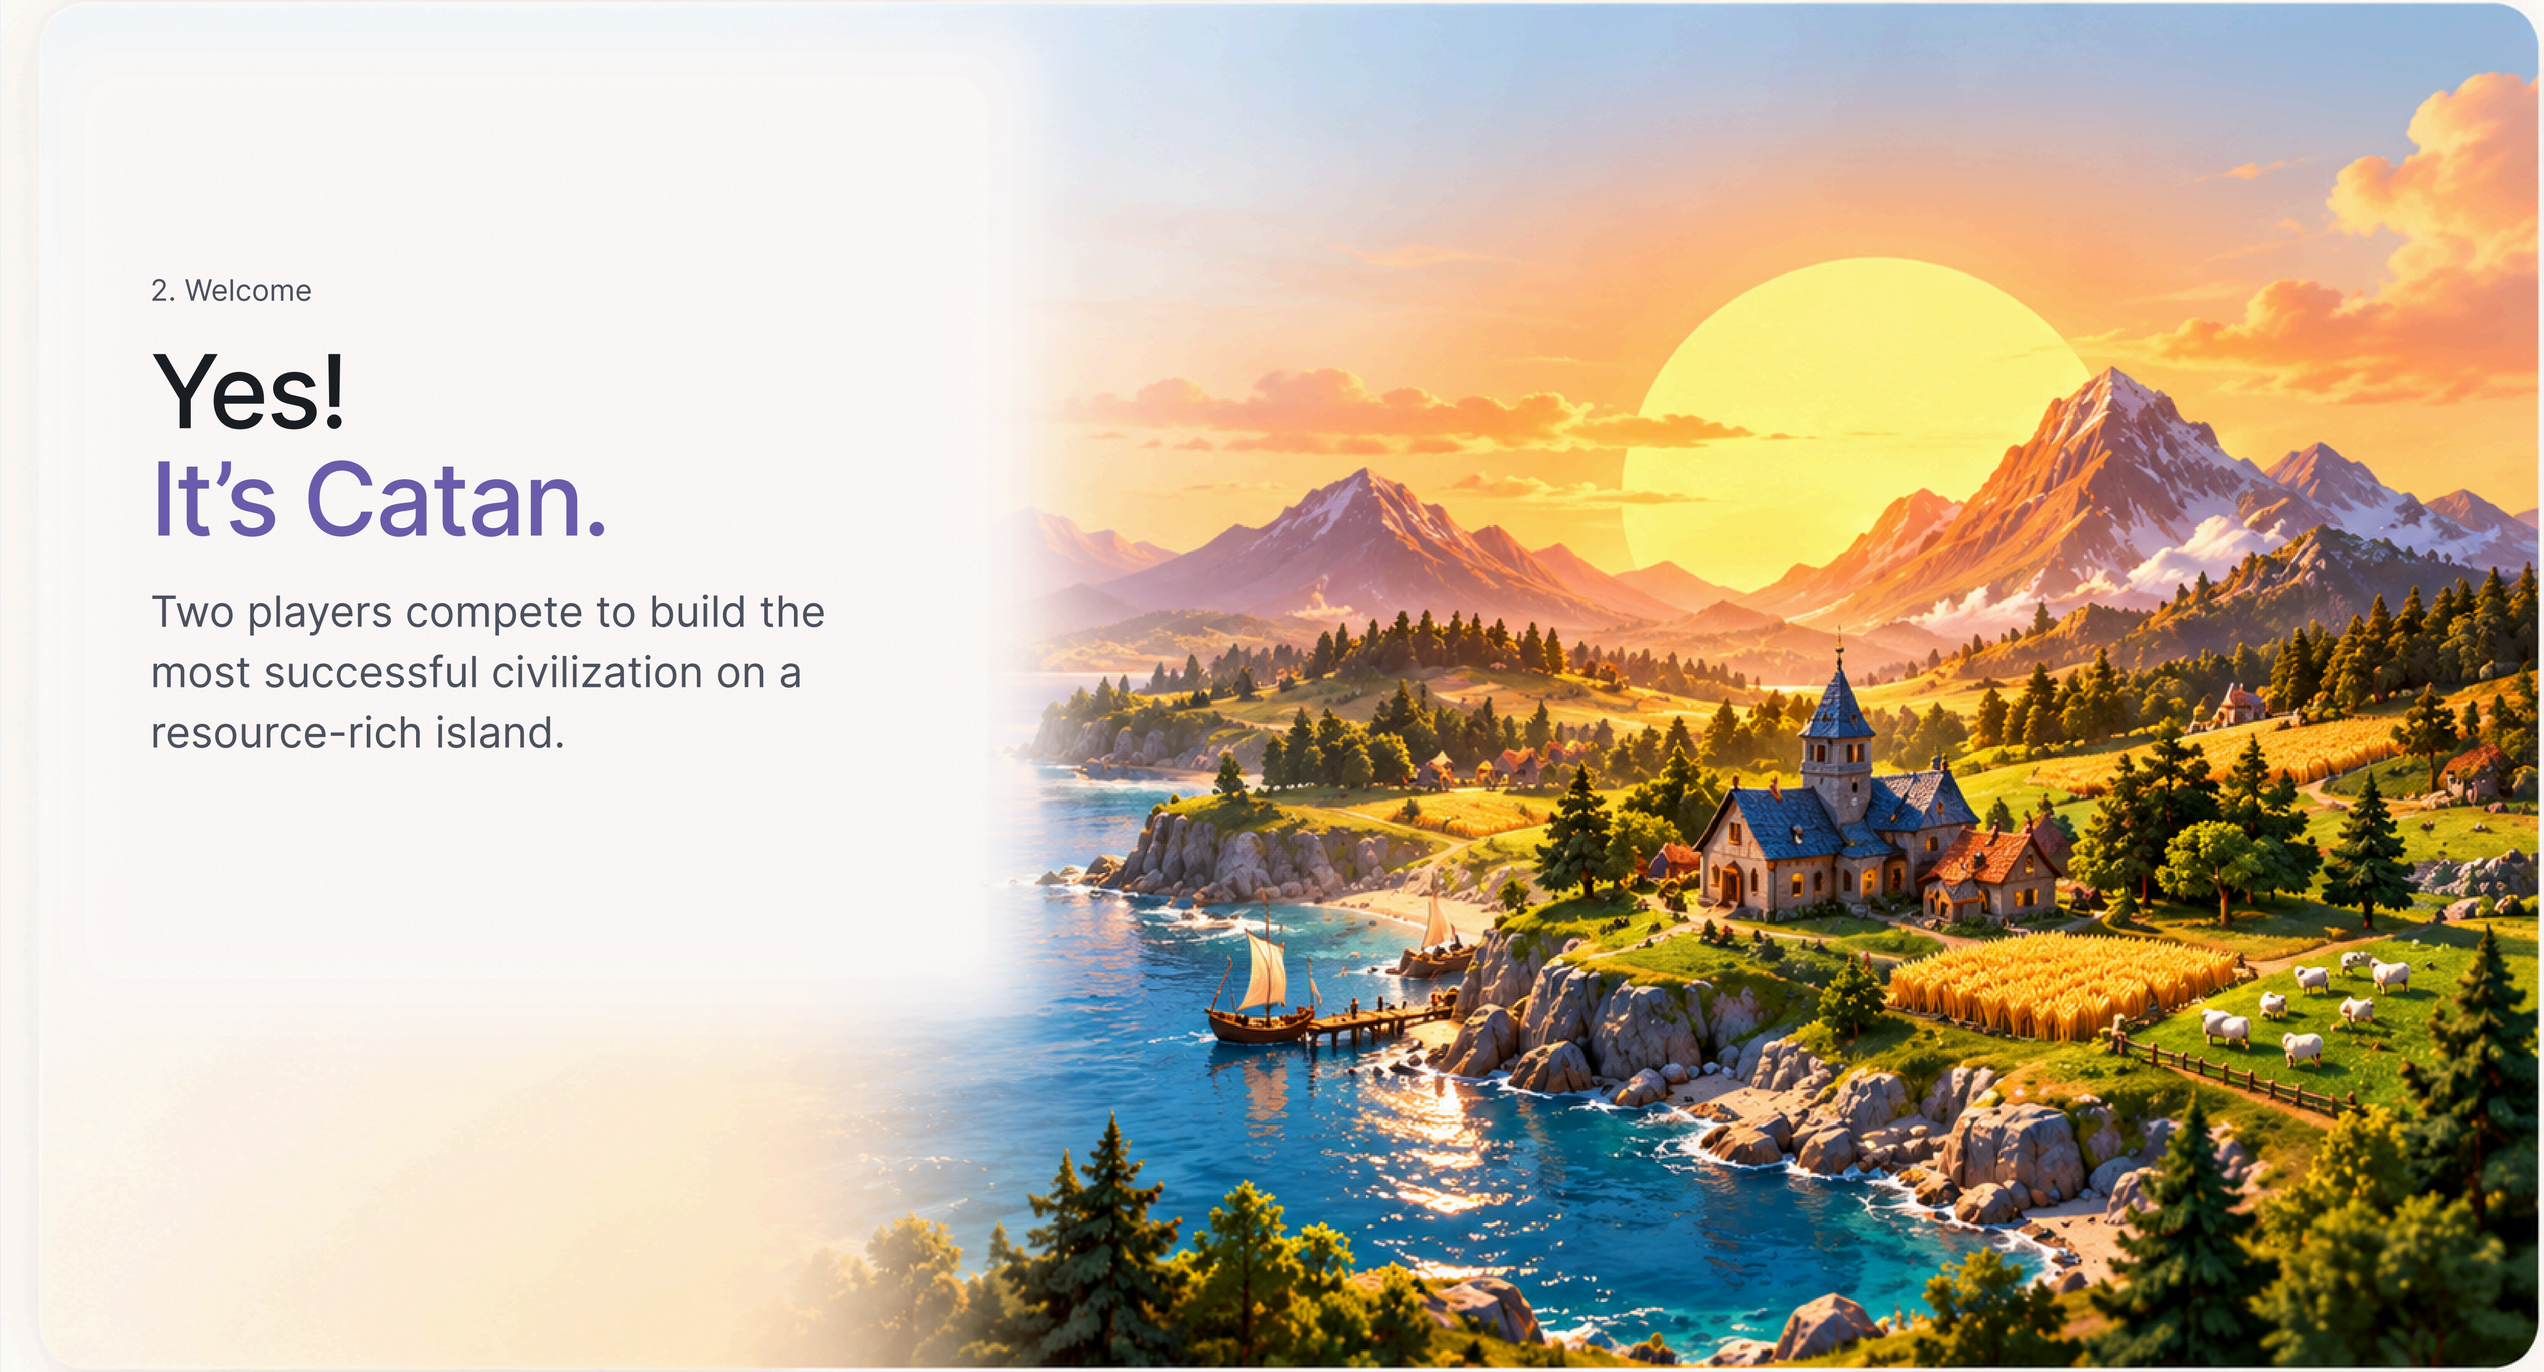
Can you guess this game?

A game of strategy, resources and empire building.

2. Welcome

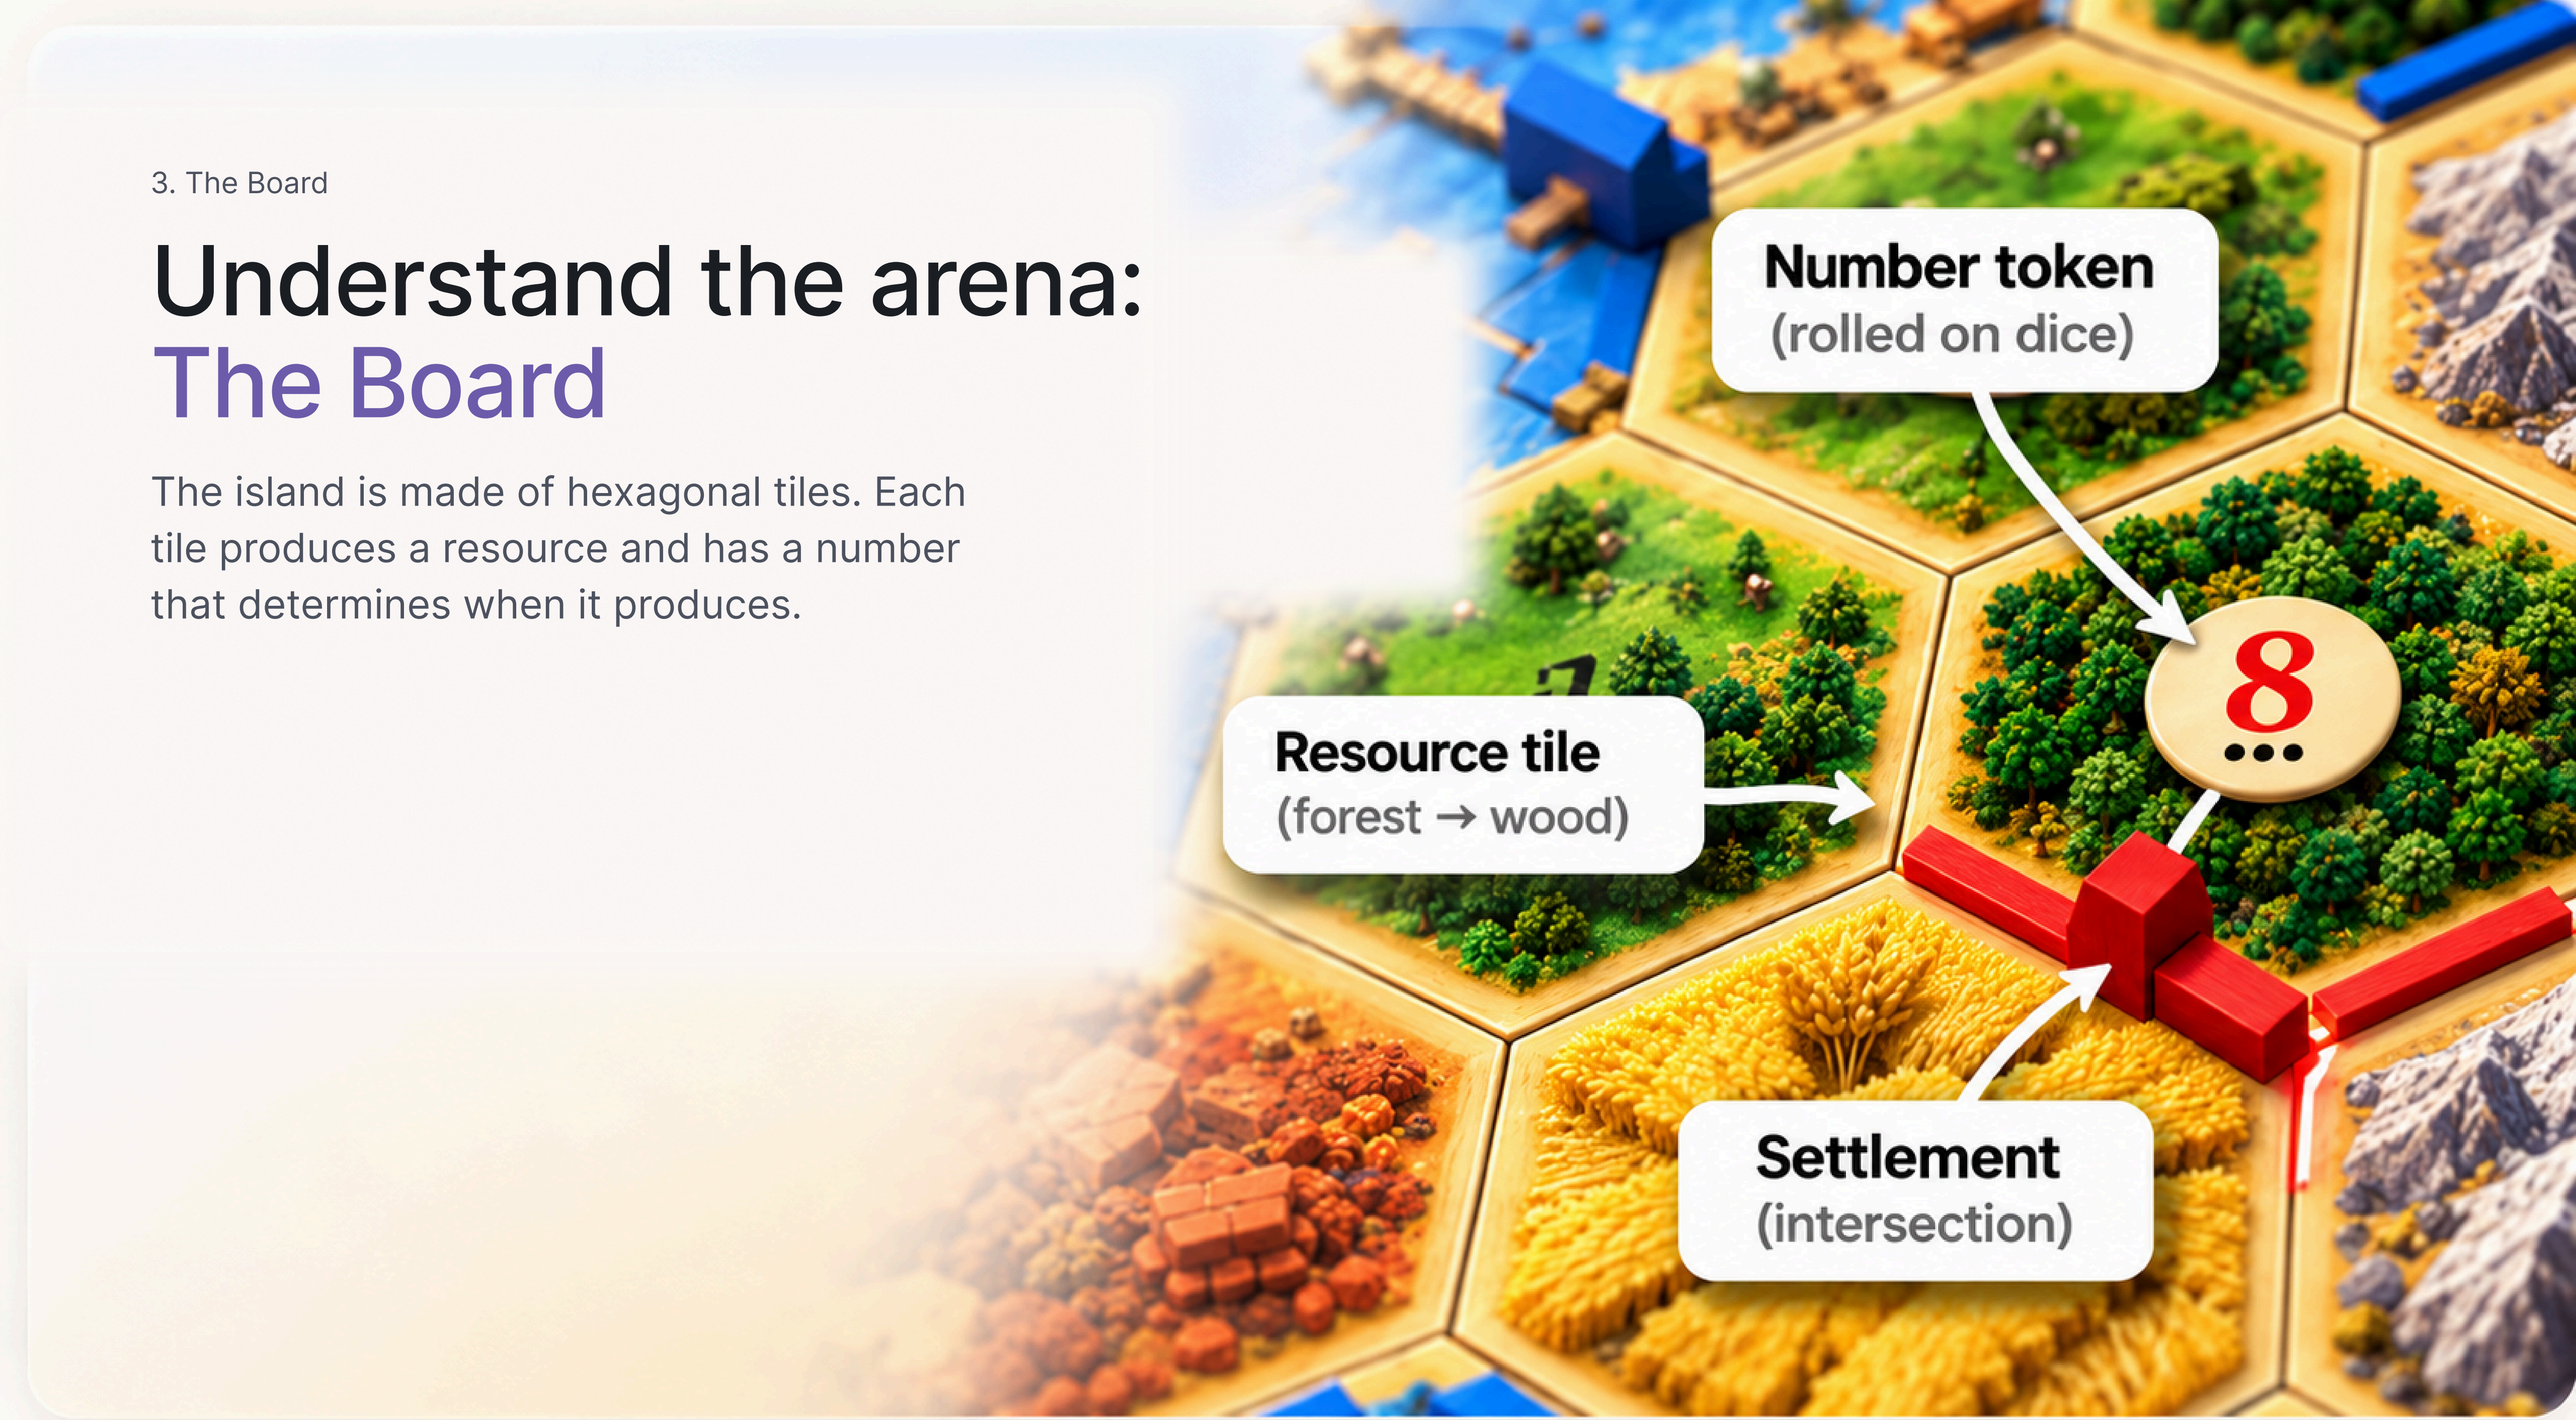
Yes!
It’s Catan.

Two players compete to build the most successful civilization on a resource-rich island.



Understand the arena: The Board

The island is made of hexagonal tiles. Each tile produces a resource and has a number that determines when it produces.



4. Resources

Five resources.
Endless possibilities.

Each terrain produces a different resource that you use to build, expand and win.

Wood
(from forests)

Brick
(from hills)

Sheep
(from pastures)

Wheat
(from fields)

Ore
(from mountains)

5. Dice & Production

Roll the dice.
Collect resources.

When a number is rolled, all settlements and cities adjacent to tiles with that number produce resources.

Example roll:

8

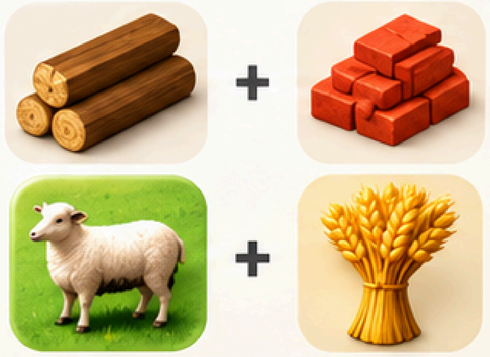
6. Building Costs

Turn resources into buildings.

Use resources to build roads, settlements, cities or buy development cards.

Road
(0 VP)

Settlement
(+1 VP)



City
(+2 VP)

Development Card
(Varies)

7. Expand

Build your empire.

Place roads to connect, settlements to collect resources, and upgrade to cities for higher production.

Road

Connects your network
(0 VP)

Settlement

Collects resources

City

Produces 2 resources
(+2 VP)

8. Development Cards

Development Cards, Your Secret Weapon!

Buy development cards to unlock powerful actions — and hidden victory points.

Knight

Move the robber and steal a resource.

Road Building

Place 2 free roads.

Year of Plenty

Take any 2 resources.

Victory Point

Hidden card worth 1 VP.

9. The Robber

Robber, disrupt your opponent.

Roll a 7 to activate the robber. It blocks resource production on that tile, and potentially steal a resource from an opponent.

10. Trading

Trade your way forward.

Exchange resources with the bank using 4:1, or better rates at ports (3:1 or 2:1).

4:1

Bank trade (any resource)

3:1

Generic port (any resource)

2:1

Specific port (e.g. wood)

Hyde

The first to 10 Victory Points wins!

You can earn victory points in five ways.

	Settlement	**+1**
	City	**+2**
	Victory Point card	**+1**
	Largest Army (3 Knight cards)	**+2**
	Longest Road (5 connected segments)	**+2**

Reach

10 VP

= WIN!
